

# INSECT TRAP

The New Insect Light Trap In The Market

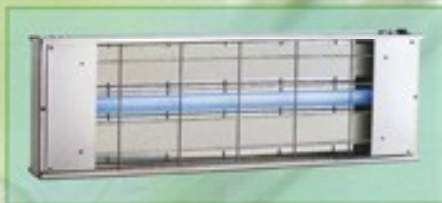

# Mushipon

## For a Cleaner & Safer Environment

Dealer  
**WANTED!**

MPS-2000 M

#### OPTIONAL

For standard model, gel tapes are exposed to both side to maximize results. Protection board can be opted to close either one side or both side of the tapes in order to keep the public eyes away from the insects that have been trapped on the tapes.

#### GEL TAPE

Using 365nm ultra violet light to attract flying insects and the gel tape to trap (stick) insects from escaping. This special gel tape is patterned by the manufacturer and proven to be effective.

#### Features :

- ✓ Using ultraviolet light to attract flying insects and gel tape to trap (stick) insects from escaping
- ✓ Proven to be reliable, safe, clean and effective
- ✓ Free of crackling sound & burnt smell
- ✓ Comply to HACCP standards
- ✓ Capture all type of insects, even very tiny ones
